

AS SURE AS THE SUN RISES!

Our Constitution, the Bill of Rights, our American Flag . . . and everything they stand for are still there. True, they may be partially obscured some days with unsettled clouds of doubts like an energy crisis, spiraling prices, shortages, and changes of all kinds. But, be assured the precious bases of our American heritage are there today as they were almost two centuries ago. The American people have decided their own destiny for all these years. And it works. We Americans live in one of the few countries in the world today where freedom of speech, worship, and the pursuit of happiness are still preserved. Circumstances change - methods change - basic principles never! Let us uphold the principles of democracy under which this great country was founded and it shall endure.

GUEST COLUMN THIS WEEK BY RHONDA GRAFF

Attending a session of Bluebonnet Girls State in Seguin, Texas is an experience that is hard to relate to others. I must start by explaining what Girls State actually is. Bluebonnet Girls State is an organization sponsored by the American Legion Auxiliary to promote national Americanism among youth. For the past five years it has been located at Texas Lutheran College in Seguin.

Upon arrival in Seguin on June 11 the seemingly mass confusion astounded us all and I am sure left many doubts in mind. As the days passed the confusion faded and understanding began taking its place.

At Girls State we learned about city, county, and state government by actually setting up our own government and actively participating in it. We organized parties, the Federalists and the Nationalists; wrote bills and resolutions which were debated in the House of Representatives and Senate of Girls State; organized a court system; and elected our official to fill all city, county and state positions.

On Monday, June 17, we traveled to Austin for the inauguration of our state officials. At this time the House and Senate of Girls State were allowed the privilege of convening in the Texas House and Senate chambers in the Capitol. Afterwards we were able to watch the Constitutional Revision Convention while it was in progress.

During the session I was elected as my party's state chairwoman, served as chairwoman of the Committee on Human Resources, and was chosen as one of the eight outstanding citizens of that session.

On July 7 I will be leaving for Washington, D.C. with eleven other girls to attend Senator Lloyd Benson's Internship Program which will include meetings with national leaders in Congress and visits to federal departments and agencies. The program will conclude on July 12.

Being a citizen of the 1974 session of Bluebonnet Girls State is something I will never forget. The guidance and direction of the counselors, staff, and especially Miss Frances Goff, the director of Girls State, made a rewarding ten days of politics and education on the American way of government.

Much credit must go to the many American Legion Units over the state of Texas which sponsor the citizens. A special thanks to American Legion Auxiliary #128 for making my attendance possible.

The need for programs such as Girls and Boys State can be found in the words of a song that I learned at the session I attended.

Which way America?
Which way America?
Which way America?
Which way to go?
This is my country and
I want to know -
Which way America is going to go!

Girls State filled me with a love of country and a desire to help in planning which way America will go. Youth needs a channel to find a love of country and a willingness to participate in that country's growth. In a world such as ours those two elements seem to be lost somewhere in the tangles of Watergate. Programs like Girls State help you sort out the tangles and realize that involvement and NOT APATHY will give America a great way to go!

Which way America? Which way America? Which way America? Which way to go? This is my country and I want to know - Which way America is going to go!

Jimmy Mangum is new Hondo police chief

Hondo's new Chief of Police, Jimmy D. Mangum, officially took the reins of his office Monday morning, July 1.

He succeeds Jim Shofner, who resigned last month. Serving in the interim was City Manager Fritz Leinweber.

Mangum comes to Hondo from Uvalde, where he served three years as a patrolman with the city police. A 1968 graduate of Poteet High School and a native of Poteet, Mangum attended Southwest Texas Junior College at Uvalde. He has completed over 600 hours of instruction in law enforcement classes from Sul Ross University, Texas A&M University, and the Food and Drug Enforcement Administration.

He is married and lives at 1403 20th St.

TAKING OVER . . . as Hondo's Police Chief is Jimmy Mangum.

Drive, eat, play carefully!

Somebody said "The primary concern of motorists during the 4th of July holiday should be to make sure there's a July 5th."

That's good advice, especially this week as millions of Texas motorists will take to the highways on America's birthday.

And it's not only the automobile that can become a sudden and unexpected instrument of death. Boats, swimming pools, backyard barbecues and fireworks extract their toll of Texans each year. But all classes of accidents claim a common denominator—failure to observe appropriate common-sense safety rules.

Auto Safety

Highways become especially jammed in the holiday season—especially expressways and Interstates. These arteries save time and fuel, but they demand increased attention from drivers.

Add to their congestion the fact that many Fourth of July drivers are not expressway "veterans", and you have a double reason to drive friendly. Don't weave in and out of lanes as soon as you see an opening, and keep your speed in line with the flow of traffic.

Boating

The nation has almost ten million pleasure boats, and lots of those ply the waters of Texas lakes and coastlines. If you're an occasional skipper, make sure the boat is in good working order, and bring enough approved life saving devices for each occupant.

If you tow a skier, post a lookout at the stern to check for other skiers and boats in the area.

Fireworks

They may be banned altogether following this holiday season, and it may be for the better. But fireworks are a traditional form of celebrating Independence Day, and so it behooves everyone—young and adult—to be especially careful. In addition to the usual admonitions about standing clear and not playing pranks with firecrackers, be sure to exercise fire prevention, too. Many homes and pastures are burned each year because a stray bottle rocket landed in a particularly fire-prone substance . . . and lawns and pastures are pretty

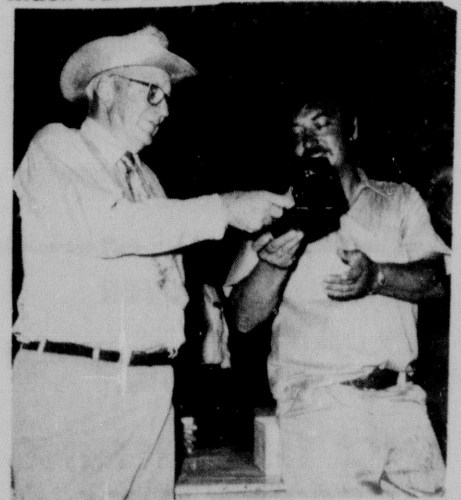

dry this year.

Those who celebrate the Fourth in their own backyard aren't immune to safety-consciousness. Backyard chefs should remember that anything white-hot coals or briquets can do to a thick steak, they can also do to a careless hand or foot.

Keep your portable grill away from well-travelled kid runways, and make sure the fire is dead before wrapping up the job at day's end. And, of course, don't squirt fluid onto burning briquets.

If your backyard includes a swimming pool, be sure that someone who can swim well is near when children are splashing around. It's also wise to recall that high diving is rarely safe at the depth of most backyard pools. The distance between a swan dive and a swan song might be just a foot of water that is needed, but not there.

One more DON'T concerning the holiday is this: Don't get discouraged to the point of being a shut-in on the Fourth of July—it's a time to have fun. The trick is to have fun in a way that allows you to think back July 5th on how much fun it was.

HONORED . . . for 30 years service to Medina County as a Game Warden was August Timmerman. Saturday night June 29, a barbecue was held in his honor on the Woody Glasscock ranch near D'Hanis. Ambulances to be spotlighted in joint meet

The Medina County Commissioners Court met Friday, June 28, and outlined arrangements to continue operation of the city-county ambulance service.

County Judge Jerome Decker said a meeting with interested cities would be held Wednesday night at 7:30 p.m. in the District Courtroom at the Medina County Courthouse.

The county judge also said the county is prepared to begin reimbursing the individual cities immediately after the Wednesday meeting under the terms of their original agreement.

Decker said if the City of Hondo

continues to decide to drop participation in the service, the county would make arrangements to provide the ambulance service in the Hondo area. However, in talking with representatives of Devine and Castroville, Decker said they had indicated a willingness to meet with the county under the terms of the original agreement and to discuss plans for the continued operation of the ambulance service.

Decker said the county has nearly \$21,000 in the ambulance program already in vehicles, equipment and insurance.

John Henry Boehle is wreck victim

A 51-year old Quihi man was killed in a single car accident at about 12:45 a.m. Sunday at New Fountain.

He was John Henry Boehle of Quihi.

Authorities said Boehle was alone in the car when it skidded out of control near the New Fountain Church. Boehle apparently lost

control of the car at a point where the pavement narrowed. He was going to his Quihi home from D'Hanis.

Funeral services were held July 1, 1974 at 3 p.m. in the Chapel of Guinn-Horger Funeral Home with interment following in the Quihi Cemetery.

A full obituary appears elsewhere in this issue.

Garden Club organizes cemetery care program

The Hondo Garden Club has voted to sponsor a program of perpetual care for portions of the Oakwood and W.O.W. cemeteries in Hondo.

The vote was taken at a coffee in the home of Mrs. Doug Mogford June 26.

In sponsoring the program, the group drafted a letter to be sent to each lot owner in the specified cemeteries. The letter reads as follows:

"To all who are concerned about our cemeteries:

"The Hondo Garden Club has assumed responsibility of caring for the Oakwood and W.O.W. Cemeteries.

"We hope that you too will be interested in helping us with this project.

"Individual lots will be taken care of for \$12 per year. Any additional sum or donation will be applied to the general care of the cemetery.

"By care of individual lots we mean mowing of grass, clearing of weeds, clearing and mowing of the roadways, watering and trash pickup. A caretaker will be hired.

"All contributions should be sent to the Hondo Cemetery Committee, Mrs. Bruno Schweers, Chairman, 1302 Avenue K, Hondo, Texas 78861.

"In the event that the lot is governed by an estate, would you please forward this letter or send us the name and address of the person in charge.

"Sincerely, Mrs. Bruno Schweers, Chairman."

Letters will be sent to lot owners, but any other interested or concerned citizen may send contributions to help this group get started on their very worthwhile cause.

Others serving on the committee are Mrs. Ben Oefinger, Mrs. Mark Marshall, Mrs. Carl Trulson, Mrs. W. L. Taylor and Mrs. W. W. Watson.

St. Johns plans big celebration July 21

Saint John's Catholic Parish of Hondo will hold its fifth annual festival July 21, 1974 at Hondo City Park.

The lovely tree-shaded park, just north of the city, will be bubbling over with excitement starting at 10:30 a.m.

A delicious beef barbecue meal with home-made potato salad, tasty cole slaw, mouth watering pinto beans and all the other trimmings will be the highlight of the day. Serving lines will begin at 10:30 a.m. and end at 2:30 p.m.

Throughout the day a multitude of booths will offer a variety of things from bingo, cakes, panda bears, sno-cones, tamales, canned goods, Country Store, soft drinks to even a flea market where one browse around and buy.

A fat 600 pound calf, auto tape deck stereo, and a \$100 saving bond are just a few prizes in the St. John drawing.

Other prizes in the drawing include the tape deck, donated by Brown Chevrolet of Devine and Alex Barrientes; a \$100 bond by Catholic Life Insurance; an electric can opener and knife sharpener by Perez Sales Agency; \$10 worth of groceries from Super Sav; an ice chest from McGuffin Falstaff Distributorship; and a combo cooler from Oscar Rhorbach and Pearl.

Winning tickets will be drawn at the close of the evening. The calf is donated by Mr. and Mrs. George D. Koch, reports chairman Mrs. Damon Westbrook.

Then for the music lovers (don't forget your dancing shoes) there will be live music.

Publicity chairman Mrs. Cyril Van Damme promises a day filled with food, games, booths and music to delight the young and the young-at-heart.

Don't forget the day -- July 21 -- See you there!

Boy Scouting employs first woman

SAN ANTONIO -- It has nothing to do with women's lib, but Alamo Area Council, Boy Scouts of America, has just hired its first ever woman executive.

She is Miss Gail Heather, a college graduate, a former model and instructor in modeling.

Miss Heather's job will be to direct matters in Exploring District 31, a program that is beamed at high school age boys and girls.

In the council, which is made up of 13 South Texas counties, including Medina and Hondo, exploring is a fast-growing program appealing to teenagers interested in potential lifetime work or professions.

Miss Heather is a psychology graduate from St. Mary's University here. She also has been a model for the Ben Shaw studio here and for such department stores as Joske's of Texas and Frost Bros.

"I feel I will be able to relate to the Exploring program and young people," says Miss Heather. "The trend today is, more than ever before, to women being involved in many areas heretofore closed to them."

She is a native of Massachusetts but lived so long in Hawaii she calls that island state home.

Chamber Corner

This is the time of year we like best in the Chamber Corner--when people stop by the office on their vacation. Last week we were honored with a visit from the Elias Cuevas, Sr. family from Whittier, California.

They were passing through Hondo en route to San Antonio, where Mr. Cuevas is a native. They were going to help his parents celebrate their 50th wedding anniversary. The Cuevas' one son stopped by the police department, as he is studying to be a policeman.

Bill Koehler from New York City, stopped in for some Hondo post cards.

Rueben M. Perez of San Antonio checked in with us. He will be the Rehabilitation Agent serving this area upon the retirement of Dan Kelley.

Lots of visits by phone this week, too. A. Mr. Larington of Denver, Colorado called to get names of javelina guides in the

Hondo area.

Salvation Army representatives of San Antonio called to say there will be no pickup this week. . . next pickup is scheduled July 8.

And, we got this letter, too:

Honor America June 14 - July 4

***** EDITORIAL *****

A DAY TO HONOR AMERICA
July 4th, 1974

John Hancock of Massachusetts signed the Declaration of Independence with a bold, elaborate and most legible flourish. It was followed by the signatures of 55 others from the 13 American colonies, 198 years ago today.

And in signing this document they called their erstwhile colonies, "FREE AND INDEPENDENT STATES", by appealing to the Protection of divine Providence (the capitals are theirs) and did "mutually pledge to each other our lives, our Fortunes, and our Sacred Honor."

On July 4, 1776, this was no empty pledge. It meant very starkly that each signer had affixed his signature to his own death warrant. Each inscription convicted its perpetrator, automatically, of treason.

Yet such was the overwhelming strength of their patriotism in their fledgling nation that they pledged their all that it might be achieved.

And in years of battle, blood, hardship and often despair, it was achieved. Today nearly two centuries later, we of America are still a nation bound by the principles set forth in that Declaration and in the Constitution which followed it.

John Adams, second President of the United States, wrote of July Fourth--"It ought to be solemnized with pomp and parade, with shows, guns, bells, bonfires, and illuminations, from one end of the country to the other, from this time forever more."

Our nation has survived much, from minor upheavals to major corruptions, to bloody civil war. But that Declaration and that Constitution remain intact. We still pledge to them our lives, our fortunes, and our sacred honor.

And in these troubled times, more than ever, we might take heed of one of our most prominent contemporary constitutional lawyers, Louis Nizer, who in a recent address at New York University Law School, said:

"Ours is a great and noble nation. We must not give vent to despondency or skepticism. . . our great nation couldn't have achieved its eminence in science, business, and culture without a healthy core. . ."

We hold these truths to be self-evident. . .

And by honoring America's founders we also honor America, itself.

This week

All she wrote

by Edna McDade

Believe it or not, July 4th is still good old Independence Day, even if it does fall on Thursday without involving a long 3-days consecutive weekend.

How independent the day will remain and for how long, who knows? Anyway, have a happy Fourth and enjoy any freedoms remaining.

If you are wearing a necktie, make it a red-white-&-blue one. Pay no attention to what our federal energy chief, John C. Sawhill, suggested in the matter of neckties which stirred things up a bit between the manufacturers of men's neckwear and the federal energy business.

Of course, he meant well and probably wasn't even thinking of informal occasions when he suggested that men should consider going to their offices without ties to keep the thermostat down where it should be in order to keep the Utilities-Acts. Payable down to where they can still be paid.

Truth-in-labeling legislation is doubtless intended so that buyers may know just what they're getting for their money. From some of the labels I read [and I'm a label reader from way back yonder], I believe price means more than content to many shoppers.

Recently a special "bargain" in sausage was going like the proverbial hotcakes. Sausage I can almost live without but, for curiosity, I read the label on this lot. Here's what it said, in very fine print and placed so it could easily be overlooked: "Contains pork or beef hearts, stomachs, tongue trimmings, salivary glands, lymph nodes, spleen, sodium nitrate and nitrate, corn syrup and special flavorings." [Expletive deleted, I'll betcha!]

With expletives being deleted from much of the daily news, this might come in handy when you've had it up to here and feel the need to blow off steam or bust. Try saying "KAKSIKYMMENTAYDEKSAN", fast and furiously and then you needn't bother to explain that what you said [or tried to say] is a Finnish word which means the number twenty-nine [29].

This I copied from a "Handy Info" column and I can't offer proof positive that this is how a Finn would say 29.

Five generations in one family and all in one clear picture reflecting pride and happiness is really reason for a happy celebration. Little Annie, daughter of the BOBBY FOHNS, will be asking some day in the still distant future: "You mean ALL of us were kin?" And she'll probably never believe that her Great-great-grandmother Leinweber [Mrs. E. R.] observed her 100th birthday in April, 1974.

Her great-grandmother, ERNA MARTIN, is among the good friends I have in Hondo and we shared the privileges of membership in the Wesleyan Service Guild.

Whatever would the English do without the word THE? [Here it is used three times in one short sentence.]

A current book on the subject of "Shakespeare's Words" reports this about "The Comedy of Errors": "THE is the most frequently used word in this play and it is used 27,547 times."

Read it and count for yourself if you don't believe it. I just took the author's word for it.

Time, Standard vs Daylight Saving, continues to be a controversial subject.

Not "common knowledge" to me is that there is a third variety of time for your 'druthers if you'd 'druther figure it out this way:

Known as "sideral" time, it determines the time interval between the moments when a certain point in the sky, such as a conveniently located star is directly overhead. Day's length, figured by this method, equals 23 hours, 56 minutes and 4.09 seconds of mean solar time.

See what I mean? I don't.

If you really want to find out just how much energy [electric] rates have changed in Hondo [since 1905] here are figures for your comparison—as quoted in ads of the Hondo Gin & Milling Company which supplied the power: "One light, 80 cents per month; Two, 70c each; three, 60c each; four, 50c each; each additional light at 35 cents each. Double above for all night rates, as for business houses, where these rates apply:

"One light per month, \$1 each; two, 90c each; three, 80c each; four, 70c each. Each additional 50c each per month. Thirty-two [32] candle power lamps at double above rates.

Anybody want to have rewiring done at the old rates?

MRS. BRUNO SCHWEERS and MRS. HARRY OEFINGER deserve an appreciative vote of thanks [here's mine] for the work they did on a display titled "THE LANGUAGE OF NAILS" which hangs on the walls of the Medina County Museum.

The nails identify histories of importance to the men responsible for laying track that carried the old SP trains on their daily rounds.

Each marking [similar to cattle brands] had a meaning all its own. There were square nails, round, long, short, with raised "indents" each having a specific use and meaning. These served to designate the date [year] the ties were laid, the supplier, and even to record the chemicals used with which the ties were treated.

I'm sure the SP records were made readily available to these ladies but think of the time they must have put in verifying, checking, mounting and completing the display.

All she wrote

by Edna McDade

Believe it or not, July 4th is still good old Independence Day, even if it does fall on Thursday without involving a long 3-days consecutive weekend.

How independent the day will remain and for how long, who knows? Anyway, have a happy Fourth and enjoy any freedoms remaining.

If you are wearing a necktie, make it a red-white-& blue one. Pay no attention to what our federal energy chief, John C. Sawhill, suggested in the matter of neckties which stirred things up a bit between the manufacturers of men's neckwear and the federal energy business.

Of course, he meant well and probably wasn't even thinking of informal occasions when he suggested that men should consider going to their offices without ties to keep the thermostat down where it should be in order to keep the Utilities-Acts. Payable down to where they can still be paid.

Truth-in-labeling legislation is doubtless intended so that buyers may know just what they're getting for their money. From some of the labels I read [and I'm a label reader from way back yonder], I believe price means more than content to many shoppers.

Recently a special "bargain" in sausage was going like the proverbial hotcakes. Sausage I can almost live without but, for curiosity, I read the label on this lot. Here's what it said, in very fine print and placed so it could easily be overlooked: "Contains pork or beef hearts, stomachs, tongue trimmings, salivary glands, lymph nodes, spleen, sodium nitrate and nitrate, corn syrup and special flavorings." [Expletive deleted, I'll betcha!]

With expletives being deleted from much of the daily news, this might come in handy when you've had it up to here and feel the need to blow off steam or bust. Try saying "KAKSIKYMMENTAYDEKSAN", fast and furiously and then you needn't bother to explain that what you said [or tried to say] is a Finnish word which means the number twenty-nine [29].

This I copied from a "Handy Info" column and I can't offer proof positive that this is how a Finn would say 29.

Five generations in one family and all in one clear picture reflecting pride and happiness is really reason for a happy celebration. Little Annie, daughter of the BOBBY FOHNS, will be asking some day in the still distant future: "You mean ALL of us were kin?" And she'll probably never believe that her Great-great-grandmother Leinweber [Mrs. E. R.] observed her 100th birthday in April, 1974.

Her great-grandmother, ERNA MARTIN, is among the good friends I have in Hondo and we shared the privileges of membership in the Wesleyan Service Guild.

Whatever would the English do without the word THE? [Here it is used three times in one short sentence.]

A current book on the subject of "Shakespeare's Words" reports this about "The Comedy of Errors": "THE is the most frequently used word in this play and it is used 27,547 times."

Read it and count for yourself if you don't believe it. I just took the author's word for it.

Time, Standard vs Daylight Saving, continues to be a controversial subject.

Not "common knowledge" to me is that there is a third variety of time for your 'druthers if you'd 'druther figure it out this way:

Known as "sidereal" time, it determines the time interval between the moments when a certain point in the sky, such as a conveniently located star is directly overhead. Day's length, figured by this method, equals 23 hours, 56 minutes and 4.09 seconds of mean solar time.

See what I mean? I don't.

If you really want to find out just how much energy [electric] rates have changed in Hondo [since 1905] here are figures for your comparison—as quoted in ads of the Hondo Gin & Milling Company which supplied the power: "One light, 80 cents per month; Two, 70c each; three, 60c each; four, 50c each; each additional light at 35 cents each. Double above for all night rates, as for business houses, where these rates apply:

"One light per month, \$1 each; two, 90c each; three, 80c each; four, 70c each. Each additional 50c each per month. Thirty-two [32] candle power lamps at double above rates.

Anybody want to have rewiring done at the old rates?

MRS. BRUNO SCHWEERS and MRS. HARRY OEFINGER deserve an appreciative vote of thanks [here's mine] for the work they did on a display titled "THE LANGUAGE OF NAILS" which hangs on the walls of the Medina County Museum.

The nails identify histories of importance to the men responsible for laying track that carried the old SP trains on their daily rounds.

Each marking [similar to cattle brands] had a meaning all its own. There were square nails, round, long, short, with raised "indents" each having a specific use and meaning. These served to designate the date [year] the ties were laid, the supplier, and even to record the chemicals used with which the ties were treated.

I'm sure the SP records were made readily available to these ladies but think of the time they must have put in verifying, checking, mounting and completing the display.

White organ and bows marked family pews.

Baskets filled with pink gladiolus, pink mums, clouds of baby's breath and greenery highlighted the main altar. A smaller arrangement of the same flowers decorated the side altar and the organ. Two flanking candleabras holding tall pink tapers entwined with ivy decorated with pink bows and clusters of bells stood behind the baskets. Hurricane lamps holding pink candles and lined the main church aisle; pink bows marked the pews.

Given in marriage by her father, the bride wore a floor-length gown of candlelight silk organza, featuring a tucked empire bodice and high neckline trimmed with Peau d'Ange and Venice lace. Tiny seed pearls highlighted the bodice, the full shepherds sleeves caught at the wrist with a lace trimmed ruffle and tiny covered buttons. The full A-line skirt extended into a lace trimmed ruffle and swept into a chapel train. Her chapel-length veil of English net accented with tiny seed pearls fell from a Juliet cap trimmed with Peau d'ange and Venice lace and accented with tiny seed pearls. She carried a bouquet of cream and pink colored roses, stephanotis and baby's breath. She wore a gold locket which her mother wore on her wedding day.

They wore identical full-length gowns of pink polyester sheer with a tiny floral design. They were designed with white lace trim on the ruffle at the rounded neckline, puffed sleeves and at the hem of the ruffle of the skirt. Sashes accented the waists. They wore pink straw picture hats with long pink ribbon streamers and baby's breath. Julie Herring was flower girl. She was dressed similar to the bridesmaids and carried a white lace basket filled with pink mums and baby's breath.

Gene Kyrish of San Antonio attended the groom as best man. A. P. Barry, uncle of the bride, gave the scriptural readings. Jim and David Weynand were altar boys.

Mrs. Mary Katherine Pollok, Falls City, organist, accompanied a mixed choir in "Twelfth of Never" preceding the processional. "Wedding Song" and "Lord's Prayer" were sung after the marriage vows. During communion "Ave Maria" was sung by the mixed choir.

A reception featuring a ham supper was served following the ceremony at the American Legion Hall. The bride's table was laid with a white cloth and white net overskirt trimmed with pink ribbon and bows. The table held

an arrangement of pink gladiolus and mums and pink candles in holders. The four-tiered wedding cake was iced in white and trimmed in pink roses and a miniature bride and groom. The groom's cake was a German chocolate and was decorated with clusters of grapes and two miniature champagne glasses. Pink rose and green leaf mints and assorted nuts completed the table.

Mrs. Joyce Herring, Kathy Billiot and Donna Wernette were in charge of the serving. Mrs. Jackie Brannigan, Corpus Christi, registered the guests. The mother of the bride wore a long green chiffon dress with a pink orchid corsage while the other of the groom wore a long beige knit dress with a pink orchid corsage.

Outdoors 'n' things

Marsupials are, as a group, the oldest, most primitive mammals in the New World. Some scientists call them "living fossils," because they have survived, relatively unchanged, for at least 50 million years. They are not, however, the most primitive mammals on Earth.

The egg-laying mammals of Australia hold that distinction. The marsupials seem to be some kind of link between those egg-layers and the more advanced types. Most of these marsupials are found in Australia, but several are found in Central and South America. Texas, and most of the southern part of the United States, has one, and only one marsupial - the opossum. Since most Texans don't pronounce the "O" in his name, let's just call him "possum."

Very few Texans grow up without becoming familiar with the possum, because his range covers

almost all the state. He is, however, exceedingly rare west of the Pecos River. In the arid, western parts of his range he is found only along the rivers and streams. He can't make it out on the treeless plains.

The possum is a good climber. That long, hairless, scaly tail is prehensile, that is, he can use it for grasping and holding. The big toe on his hind foot is clawless and appposable. That makes it like a thumb and lets him hold things with his hind foot as you would do with your hands.

Hollow trees and logs are preferred den sites, but he is really not all that particular. He will use wood piles, rock piles, crevices in cliffs, under buildings, in attics, and underground burrows. Since the possum is not a good digger, when he uses a burrow he uses one dug by some other animal.

The possum is more or less solitary, and strictly nocturnal. He comes out right after dark and

ambles around most of the night looking for food. In this department he's really easy to please, it seems that he'll eat absolutely anything. Stomach analysis has turned up insects, rabbits, horses, other mammals, birds, chickens, eggs, lizards, frogs, snakes, snails, crayfish, fruits and berries, and other various and assorted fare. We know, of course, that much of this food was already dead when the possum found it, because he's perfectly content with carrion. That's why so many of them are run over by cars. They're out on the road looking for the bodies of other animals that have already fallen prey to the traffic. This is a mark in favor of Mr. Possum. He helps to keep our fields and woods clean as he goes about disposing of the dead bodies of other animals.

The breeding season in Texas extends throughout the year, and, in spite of the old wives tales, possums mate very much like other animals. The nostrils of the female have absolutely nothing to do with her impregnation. The young, 5 to 21 at a time, are born after a gestation period of only 11 or 12 days. They are born tiny, half developed, blind and helpless. The only thing that is fairly well

developed is the front limbs. Using these, he pulls himself up and into his mother's pouch. At this time it would take 2,380 of them to weigh a pound. In the pouch, no more than 13 of them will find a source of lifesaving milk. The teat will swell up in their mouth and attach them permanently until they grow big enough to open their mouth wide enough to turn loose. This takes about seven weeks. All the excess, over 13, simply die of starvation.

Biologists report that in one East Texas county 10,000 possums are killed each year for fur and meat without any apparent decrease in their numbers. They say that in good possum country you will find about one of the little furry scavengers to every four acres, and that's a lot of possum. These biologists admit that the possum does some damage to domestic fowl, to some field crops, and to ground nesting birds. They contend however, that the economic value of the fur, and, in some sections, his value as food, outweighs his bad traits. I believe I would also add his value as a scavenger-he is an important member of nature's clean-up crops. In any event, he certainly has a place in the scheme of things.

Don't be among 42 persons predicted to die in Texas

AUSTIN -- Colonel Wilson E. Speir, director of the Texas Department of Public Safety, today estimated that traffic accidents during the 102-hour July 4th holiday weekend would claim 42 lives in Texas.

Speir, who did not make an estimate for the Christmas-New Year period because of rapidly changing conditions brought on by the energy crisis, said the traffic situation has become more stable in recent months. He noted that gasoline is readily available in most sections of the state, and pointed out that this would probably bring additional traffic to the highways during the approaching holiday.

The July 4th holiday last year, which was only 30 hours in length, resulted in 13 traffic deaths in Texas. The 1972 holiday, which was 102-hours long-the same as the upcoming period--was marred by 80 deaths.

The DPS director pointed out that excessive speed and drinking drivers would make the largest contribution to the fatal accident toll, and he warned that all available DPS troopers and department facilities will be utilized to watch for unsafe and reckless motorists.

"We urge every Texas driver to join with us in this all-out effort to make the July 4th holiday period as safe as possible," he added.

East Texas sports 'toughest' golf course

"This south course is a par 71, and the course record for tournament play is par?????"

"Yes, that's right, they say that the fellow that built this course changed the holes to make it tougher everytime someone parred a hole."

And "that fellow," the late J. C. Benedum, an oilman, did a lot of other things to suit himself. In 1947, taking 1,500 acres of East Texas piney woods dotted with eight lakes, he carved out and polished not one, but two of the finest 18-hole golf courses to be found anywhere. Golf Digest lists them among the 200 toughest courses in the country and they are among the 50 in Eastern Airlines' guide to great courses.

To the golfing complex Benedum added an antique furnished guest mansion with 32 bedrooms to go with his own 10 bedroom pad; a 110-foot lighted free form swimming pool; hunting dog kennels; a skeet and trap range; facilities for raising quail, pheasant, chukar, partridge and mallard ducks; tennis courts; a

3,500-foot air strip; dining facilities and meeting rooms.

He called it Fairway Farm Hunt Club. And, until his death it was operated as a private club-open only to an elite few individuals and company executives.

In 1972, after Benedum's death, Fairway Farm was purchased by Austin realtor, Herman Neusch (pronounced Nash), and it is now open to the public. The place is rapidly gaining popularity as a site for company business sessions, but it is virtually undiscovered by the general public.

Located off State Highway 21 five miles east of San Augustine, Fairway Farms offers room (double occupancy) and three excellent meals for \$29 per day per person. Daily green fees are \$7.50 on weekends and \$5 weekdays. In addition to golf, activities available include swimming, tennis, horseback riding, hunting, skeet and trap shooting, billiards, and fishing, either in the farm's lakes or on nearby Sam Rayburn and Toledo Bend reservoirs.

SHORT HOLE -- Only 150 yards long, par 3, number 8 is one of the shortest holes on Fairway Farm's south course. Of course,

from the tee to green it's all water -- but, then, that's what makes a course interesting. (TTDA Photo)
